

Peregrine Falcon
Photography by [redacted]

The Peregrine Falcon is the fastest flying bird, estimated to reach speeds in excess of 200 mph when diving. Their population has been decimated by the pesticide DDT, which caused them to lay thin-shelled eggs which have difficulty hatching.

The Peregrine Fund's World Center for Birds of Prey in Boise, Idaho, is dedicated to the study and preservation of falcons and other rare and endangered birds of prey.

PLEASE HELP RUSSIA REFUGEE GROUP FINANCE each over seas ??
Why must we be in debt here, Help Israel's - Russian refugees - why don't they help Russia re-group? Why must we back Russia? Why must we finance each over seas??
