Hi C-Span,

now that Congress is on  
vacation we get some good programs, interesting  
programs, at one time the house of Rep.  
meetings were interesting, the people acted  
and sounded like educated men and women,  
today act and sound like idiots, Congress  
never intended to balance the budget, (BBB's)  
they worked to get things as they want  
them so they are not going to change  
their ways, term limits is the only  
answer to the three (BBB's) or to pay  
down the deathax, it is insane to think  
the federal income of six trillion cannot  
find enough money each year to pay  
something on the huge debt of four  
trillion that Reagan and Bush ran up,  
~~unhappy~~ even though it is I am well I  
like I watch a lot of your morning  
call programs, sometimes your guests

are interesting, and have the correct answers, but few can answer correctly about medicine, I have been on medicine for 34 years, have followed the literature and programs closely instead of cutting amounts of payments to doctors and hospitals (and call it not a cut) is only trying to make the public think they're cutting expenses, most every country that is civilized has a workable health insurance program for its citizens, medicine came close and did work until Congress added people under 65 and aliens, and anything else they couldn't find anything for, I have written my state legislatures suggesting they have a call in program for Oregon, also to advise us on bills before the house, today most people in my state are ignorant of what our law people do, thanks again for your program, do not change it except to keep up with the times

Sincerely,
