

5-28-93

The other 57% of the people living in the U.S.A are not represented by the Administration. We have almost no voice. When the liberals are on answering questions the answers they give to the best questions or statements are just plain stupid.

On your 5-28-93 show with, John Palmer Myron Waldman and Robin Gower they almost completely overlooked the basis of the statement made by a business man from (I believe) Florida. That man represents the problem of manufacturers all over this country. He has 600 employees

and will be forced to lay off some in order to make a profit (heaven forbid) and compete with the rest of the world. There will probably be less Tax revenue for the government. What will happen to the people who are laid off? Will they have money to circulate in the economy? Why can't you ever get someone on that can make the public understand the fallacy of the whole thing.
