MACKINAC ISLAND, MICHIGAN

Arch Rock is a natural limestone formation that rises
149 feet and spans a 50 foot area.

Photo: Mark Fay

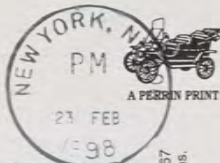

dear C-SPAN:

YES! I derive great pleasure
and education from the seminar
(Harvard/Colorado/Herbst Program)
on Tocqueville's political philosophy
you have broadcast this week. It
is reassuring to see scholarly dis-
cussion included in the spectrum.

NO! For a while this winter you
all improved in pronouncing the
Democratic Party's name correctly.
YOU ARE ALL SLIPPING AND IT
COMPROMISES
THE FACE OF
FAIRNESS.
JUST SAY IT!
-A loyal viewer.

DO NOT WRITE BELOW THIS LINE

(If Daschle called
Republican members
of the "Publican"
Party, would you go
along with it?)
