DEAR C-SPAN:

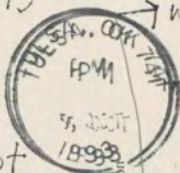

My local cable company (Tulsa Cablevision of Tulsa) is not carrying C-Span II anymore. This is especially frustrating, since some of your programming switches from C-Span I to C-Span II at which point me, the viewer, is left programless. This happened during the Midwest peace treaty signing. At a climactic moment, the program changed to a debate in the House.

Is there anyway I can influence my local company to carry C-Span II?

I disagree with how they went to carry it

Which is to piggy back it with C-Span I.
Thank you in advance for any advice or information.

Sincerely,
