

SOUTH WALES.  
GREAT BRITAIN.  

20th July 1988.

Dear sir/madam,

Having watched your coverage of the Democratic party convention on *SKY channel* this week , I felt that I had to write to congratulate you . I have a keen interest in politics and your broadcast has not only fed that interest but has also clarified much about your own political system. I was also pleased to hear that you will be broadcasting British political events in future in America. I think this will be a first step in making all people more aware of their neighbours in other countries and can only serve to make the world a much better place. While I realise that the current broadcasts to Europe are only experimental I certainly hope to see more live coverage of American political events in the future. Unfortunately I shall be on holiday when you cover the Republican convention but despite missing this I look forward to any further coverage of events you may provide in the future.

May I also add that I particularly enjoyed the telephone calls that you took from Europe and perhaps this may be a blueprint for a future programme where you could link European and American viewers in topical discussions with leading political figures on both sides of the Atlantic. Please also thank the host of the broadcast . He handled a very difficult job well even though he could not remember the name of the celsius scale for temperature. On that note I will close my letter and hope to see more of your broadcasts via *SKY* soon.

Yours Sincerely
