Dear C-Span CEO,

I think C-Span should be considered a "network" and available to all the people instead of ones on cable/satellite only.

He are the "people" as well as those who can afford cable/satellite and just as interested in our government issues day by day as they are.

I can get C-Span here but my daughter in FL can't because of her finances. Evidentially, when I visit the family there I'm at a loss keeping up with issues I normally get at home.

I think we would have more interested citizens in our country today should they be able to get C-Span rather than Jerry Springer every place --- how about you? I want to know my country's issues rather than how "paid" families get along in households only and show the ones who can't get along.

I got to see on NBC-TV tonite that our President will be impeached, if all goes as Republicans and few Democrats have their way, but I'd liked to have seen more than the total "yea" - "nay" votes. I could have, had I been at home instead of at my daughter's, on C-Span. To be home and hear all this, ah! Instead I'm watching NFL play off, Ugh! [REDACTED] Yours truly [REDACTED]

Why don't you add your address on your voice mail also? I made two unnecessary calls trying to get it.
