The week with ~~Cesno~~ Sesno

The Keto (traditional) with Pat Schneider, Latt and Smowcroft of the
2, against ~~the~~ (1) Progressive vs 2 died in the West Republican post

Women feel defensive enough why elongate it yet again?

Why not have included Roseanne and soon the Mary T. _____
program when she has 3 women local and one foreign who
speak more or less of the same issues perhaps they have no
agenda I like the aftermath discussion with Kathy? Carrie?
[no name plate] and Cesno as he related what my husband
always says they [Specials] of Congressmen included Not saying
a thing and Sesno said it for my loss - diplomacy. So
that what we're after - as he (Sesno) said they wouldn't
want their name pinned to it. Well lets have someone
pen their name to it.

I thought it was fair when Patricia Ireland said
in her Kick-Off speech the other day from Boston, about
what it means to say I'm going or supporting [some fashion]
the March, the #1's, in a situation that other organizations
are finally showing up also, but the N.O.W. Organization had
to be defensive as they're fighting stereotyping (stigmatism)
a phrase - one person to another (a man and a woman in fact)
"oh you're going to the Rally". He to her. She puts on a poker face
and says a "what's funny?" "Are you the alternative?" "It's in

his Home Court now - He can defend his words. I thought it wise and that I thought went into that retort as this was "just the thing to say".

I've been he playing that I taped material during the Presidential Campaign I think there's that I straight talk between Paddy Murray then Candidate for U.S. Senator and Sen Chandler the TX incumbent. ... for instance the future new kind of jobs vs the Ty line steel here in the U.S.A., the ecology cleaning it up. That is what the delay

is all about in closing down the military at least here in the United States jobs here 1) new methods and as Aspen said; Cleaning up and Closing down go hand in hand not following one another - its an approach that sees' many hands doing the work in getting the job done. I will give you a situation when my

daughter and I looked together just starting out as a two-some in the kitchen. One would get the pans etc (the Makings) ^{white the} other would get the cookbook etc, while the "dirty" cups used were put into the sink they got washed and were drying; later I gave the cake batter my 50 strokes (relief) and then she got the oven on the pans floured - we were a team staying out of each others way doing what came naturally - do you get my drift -

that seems to me what is going to happen with the endangered species action there when a manager gets there and its not unlike what will happen also at the house closing. I think understandable because I can relate to that operation via my example we have no clues with foreign affairs but we know some problems price of wheat is fixed not just that farmers are guaranteed a profit but its a bargain - my chip in Foreign Aid well gun sales was also used didn't Eisenhower warn us of it and who are the ones who up hold a strong defense - Didn't the few planes which bombed the places of Africa in Somalia rather unique and not used but still around no high tech but the right combination to be used a must some one knows what is uniquely needed. But that would have things meeting in the fields of Texas again.
