Your quest from Newsweek on Monday, 14th I wanted to ask him what he thought of Mr Gray the FSB regulator who took over a FSB in Florida paying him self 950,000. dollar for 1989.

There is a few question that never get answered. Or are they no no.

What happen to George Rust's brother that was building golf courses in China before the uprising?

How Boesky was allowed to sell 400 hundred million in stock. then only fined ~~a~~ hundred million.?

When we have the H.C.S. deal. Will anyone be punished.??

Last Aug. Mr Bonst in an interview said he could not make it on \$99,500. salary. His wife had to work. While

he was head of education he smoked 3 pack a day.

Do any of the reporters and media people you have on. Has any idea what affect this has on 10-11-12 grade student. We know that drinking in the colleges are increasing every year.

That statement "Read my lips." Have don silly can people get. If that many people are hard of hearing we have just as many are blind. Or was it just the media he was referring to.

The fastest growing business in the 80's was greed & fraud. and is still going strong.

No? Things like this would not cause the young to drop out of school. As that rock & roll music they listen to all the time. It could be they don't want to hear about Allie North the great hero. Could it be they don't want to hear the great flag debate

Or they want to read more lips.

I hope that the T.V. + Newspaper, are really in to reading lips. So the public out here will get something out of the Budget Talks.

Thank you your time
Sincerely
