

THE LOS ANGELES WORLD HUNGER EVENT

4/24/84

I watch C-Span Because:

First of all its Live, or damn close. That is, if it isn't live - its of the very near recent past. Next, a wide variety of Subjects are covered which I find to be of great interest. Its great to have the actual workings of Congress and Sub Committees right in our Living room, As it should be. I saw a program with the "union of Concerned scientists" re: the stars wars debate that was fantastic. C-Span shows many points of view, with out judgement. what you see is what you get. C-Span also uses the media in a way that is immediate, important and appropriate. This is T.V. As it should be used in the 80's. As pure education, and away from the "wasteland" of the old T.V. ways. - An alternative to Love Boat.

I watch C-Span because I am a human being who is very interested in having our planet succeed, and I feel that C-Span aids me in my education toward that end. As Nesbitt said in Megatrends, "the new source of power is not money, but information in the hands of many." Thanks for the information!
