THIS LETTER IS TO INFORM VOTERS THAT
**SENATOR HATFIELD IS A LIEING
HYPOCRITE,** WHO SHOULD BE INVESTIGATED FOR
OBSTRUCTING JUSTICE,

Senator Hatfield of Oregon with the help of congressmen, the Oregon Bar, the Oregon State Board of Engineering Examiners, members of the professional land surveyors, media and non-profit organizations has, since 1982, been using his clout and lies to prevent a federal investigation of illegal land survey problems in Oregon.

The claims made in the enclosed 10/14/82 report by the surveyors who represented Lincoln County and the State of Oregon are deliberate lies.

A simple on-site view of the physical county road and tax lots proves beyond any reasonable doubt that the surveyors were using desperate tactics to prove Tax Lot 602 existed physically.

They were trying to cover-up a falsified road survey made by the county road engineer and was accepted as correct by the county assessor and county commissioners.

The on-site view of the physical county road and tax lots proves these indisputable facts: Tax Lot 500 is bound by Tax Lot 700 - the Yaquina River - Tax Lot 603 and County Road 533.

Tax Lot 604 is bound by Tax Lot 700 - County Road 533 - Tax Lot 600 - and Section Line 15-22. There is no Tax Lot 602 except on paper.

Hundreds of letters (many certified) have been written to public officials in an attempt to have a federal investigation. Not one official would offer any help. I have photocopies of my letters and the few replies received.

Do we want to take chances on re-electing elected officials who cover up for each other?

PLEASE MAKE COPIES AND
SEND TO OTHER VOTERS

Yours for honest government,

Toledo, OR 97391

VOTERS - LANDOWNERS

The deliberate lies were made to prove Tax Lot 602 was legal property which the county had bought for widening County Road 533, and to get revenge on me for blowing the whistle.

Senator Hatfield stuck his nose in it to prevent a federal investigation.

Oregon Governors refused to investigate.

TOLEDO, OR 97341

REPORT TO THE OREGON STATE BOARD OF ENGINEERING EXAMINERS

10-14-82

(OSBEE)

SUBJECT: Investigation of [redacted] Matter Now Before OSBEE

FROM: Jack Burrell, L.S. #1630

My investigation has shown no reason to believe that the fundamental basis of Mr. [redacted]'s allegation is correct. Tax Lot 602 does exist and can be traced through deed conveyances. It can be plotted on maps after careful study of these deeds. It can be located on the ground by survey. The existence of the tax lot is substantiated by Survey No. CS 10,005 (Exhibit M). This survey was performed by Mr. John Hanna, Lincoln County Surveyor, in August, 1982 and he independently arrived at the same conclusion that I did. David Loomis, registered surveyor (L.S.# 1908), provided consultation for Mr. [redacted]. Mr. Loomis has evaluated my worksheet (Exhibit D) and indicated to me that he agrees with the information shown there.

If Mr. [redacted] believes that he may have a claim to this property (Tax Lot 602) on some other grounds, my advice to him would be to seek the consultation of an attorney.
