B 1

I want C-SPAN for many reasons. I am a 13 year old student who happens to be very interested in my country. At my age I may not understand all I hear or see in regards to the coverage I see but it will be helpful to let me get acquainted better with my government.

I am a good student, and this can help me to be a better citizen and student I think.

People need to better understand our government and how it works. There are many things that probably are wrong and could work better, but even with the faults, it is still the best government and country in the world.

C-SPAN gives me and others the opportunity to watch government live at work - where else would this be possible? Thank you.
