OCT 29 REC'D

To Whom It May Concern:

I want to relate a tremendous waste program that is going on in our Government to see if anyone will investigate and expose it to the American public. We are continuously told to become involved but there are apparently some things the Media does not want to become involved in.

There is a dump (government) in Stafford, VA that needs to be checked into. A neighbor of mine who was helping to repair a blacktop drive leading into this dump relayed this information to me, along with hard evidence to back it up.

A truck was held up due to repair and several of the workmen checked out what was in the truck in absence of the driver. They found and helped themselves to several cases of brand new three hole punches (heavy duty) still in GSA packing with rubber bands holding down the handles. There were brand new inspected but unused computers on board of which two were taken by road workers. On inspection, there was also new refrigerators still in crates on board and numerous articles of clothing still in cellophane wrapping. There were also many other items which they did not have time to identify.

The most sickening part of this whole thing was that all of these goods were being placed in a hole in this dump and covered. I believe this process starts at budget time. If a department has not spent their budget allowance for the year and to insure that it will not affect their next years budget, much of equipment on hand is dumped and new equipment is purchased all over again.

I just cannot believe, if I know about this, surely others who are in a position to do something about it also know. It shouldn't take too much investigation to prove what I am telling you is the truth and I hope CNN has the guts to inform the public. This is just one dump, imagine the hundreds of thousands of dollars that is being dumped in the many Staffords around the country.

For obvious reasons, I cannot disclose my name but as a faithful viewer of C-SPAN, I will be watching to see if there is any follow up of this free information given to you.

Sincerely,  
A SICKENED JOHN Q. PUBLIC

## INSTRUCTION SHEET FOR FOOTHILL "310" SERIES PERFORATOR

NOTE: A dime or paper clip will fit the adjusting screw slots.

1. OIL: This punch has been lubricated at the factory and shouldn't require oil for quite some time. However, if any sticking is encountered; depress the handle all the way. Put a few drops of oil around the top of each punch head (item D.Q.) then work the handle up and down several times. Use a light weight machine oil.
2. STANDARD SETTINGS:

|                                   | Setting      |
|-----------------------------------|--------------|
| Center Punch Head (item T.I.)     | 0            |
| Left and Right Heads (items T.I.) | 4½"          |
| Scale -Paper Guide (item E)       | #11 lined up |

with the inside edge of the cover cut out (item K) next to the set screw (item J).

TO CHANGE THE SETTINGS ON THE SCALE: Loosen set screw J and move scale till the number on the scale is the same as the length of the paper being used. The number on the scale should be lined up with the edge of the cover cut out just next to the set screw (item J).

TO CHANGE SETTINGS ON THE PUNCH HEADS: Loosen set screw (item N) slide punch head to desired position and retighten screw.
3. TO REMOVE PAPER CHIP TRAY: (item F) Press down from the top with both thumbs.

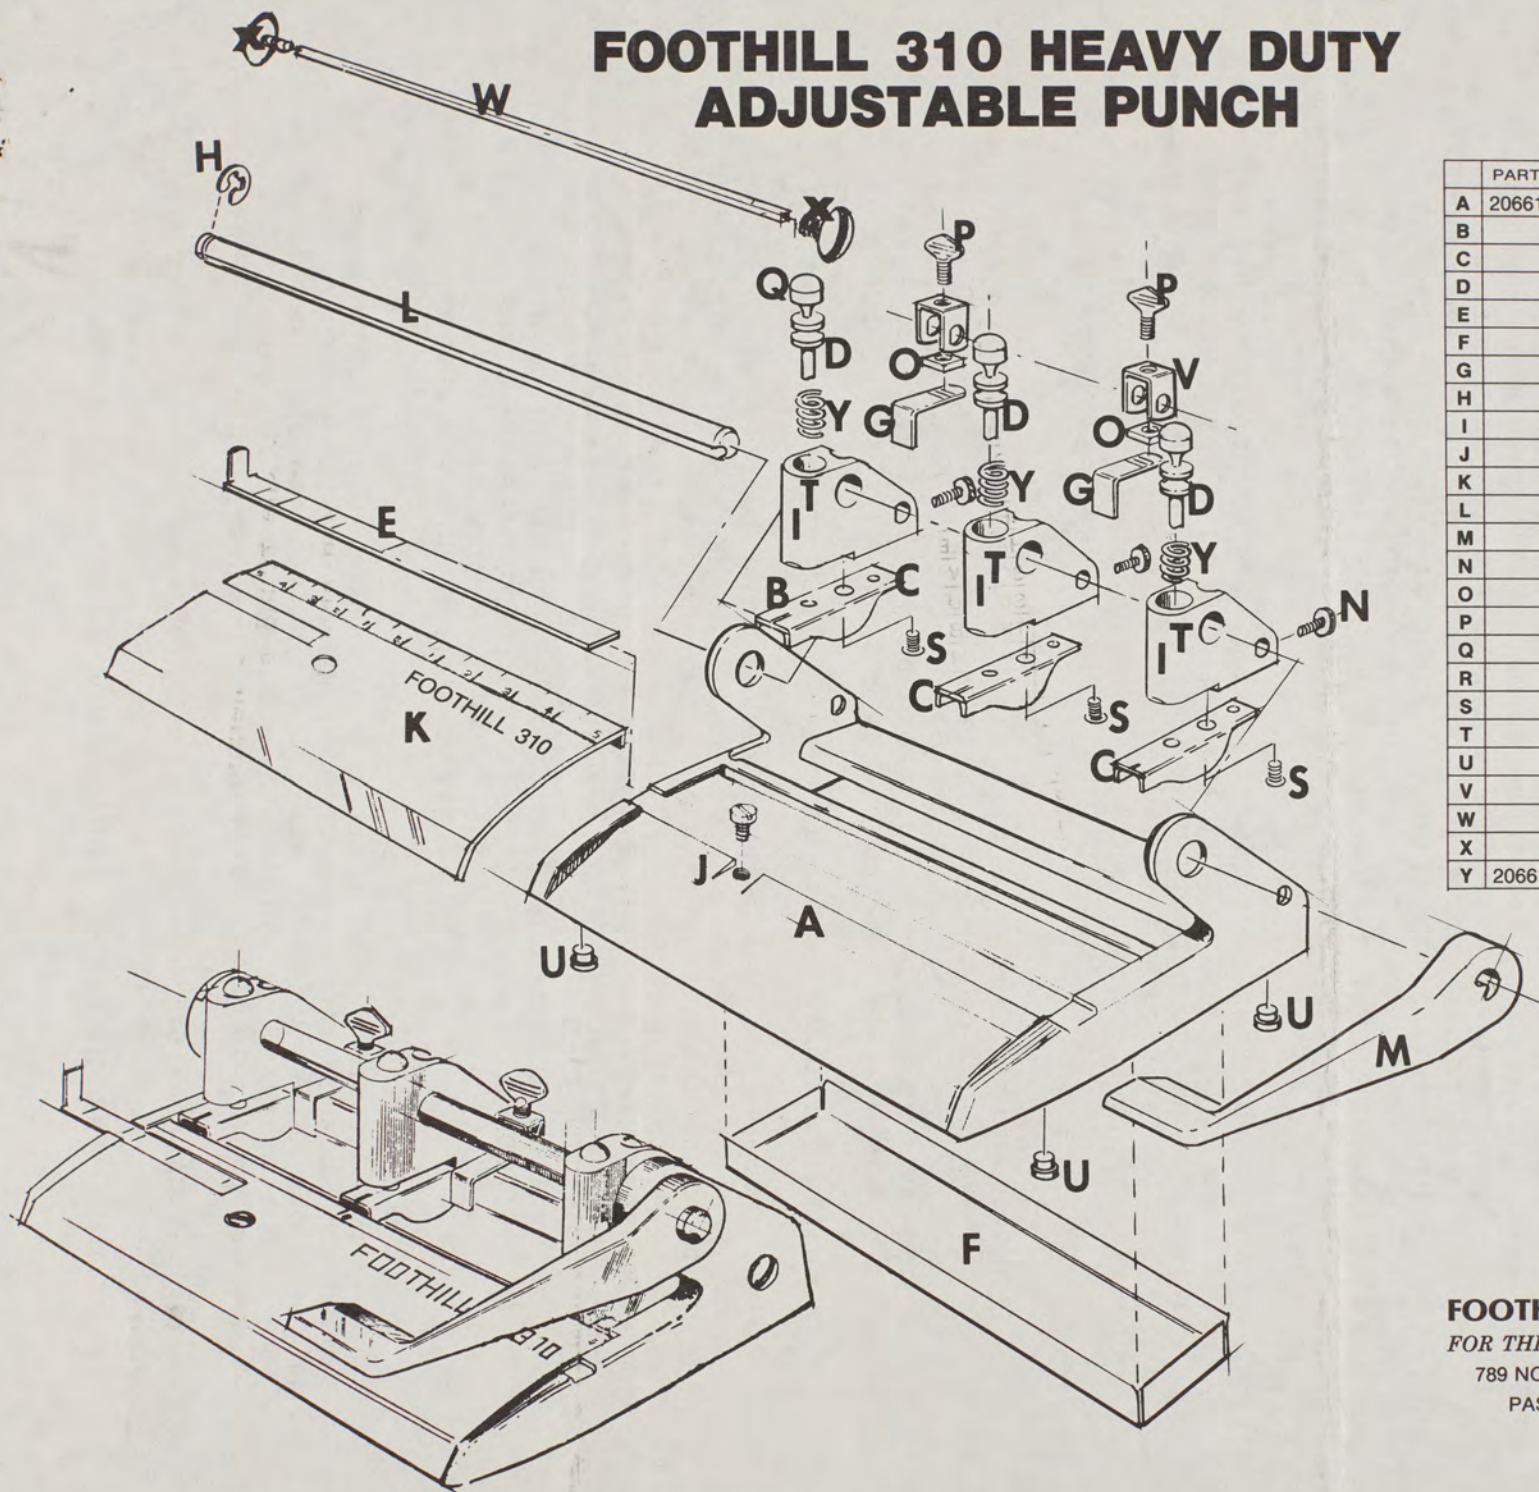

TO REPLACE: From the bottom of the punch place the side with the greater bend in first, then press the other side in with both thumbs, the pan will pop into place.

TO PREVENT CHIP BUILD UP: A tilt from left to right after each heavy punching is recommended. This will scatter the stacked chips.
4. MARGIN CONTROLS: Paper stops (item G)

The depth of the punch heads will give a standard margin without using the margin controls. If a narrower margin is required, loosen thumb screw P move paper stop G to desired depth and retighten thumb screw. Repeat the other margin control. To be sure both margin controls are set the same check the lines on the top of the paper stops.
5. TO REMOVE AND REPLACE A PUNCH HEAD: Loosen screws (item N) that hold the the punch head to the square shaft (item W). Loosen paper stop thumb screws (item P). Remove screws (item X). Slide square shaft out until it is free of the punch head you wish to change. Remove retainer (item H) at the round end of the shaft; pry up with a screwdriver, but cup your hand over it so it won't get lost when it comes off. Slide the round shaft out until it is free of the punch head. Put the new punch head into place and slide the square shaft and round shafts through it and into their original positions. It is necessary to push down on the punch (item Q, D) as the round shaft goes through. Replace retainer (item H) and screws (item X). Reposition punch heads, tighten screws (items N) and the thumb screws (item P).

Attached you will find copy of Instruction sheet packed with PUNCH and also a print of label on end of box. If this is something that C-Span doesn't want to handle, please turn it over to a CNN representative. Something needs to be done to stop the horrendous waste going on in our government.

BASIC HUMAN MANIFESTO

(It's a New Constitution . . . It's an Olde Promise.)

The Generally Dynamic Statements of "A Third Political Party for the U.S.A."

[Property of the People]

In SESSION, **OCT 29 REC'D** 3586-94

Yesterday

Many score and some years ago, OUR founders brought forth on this continent a new nation, conceived in liberty and dedicated to the proposition that all men are created equal.

WE now hold this truth as self-evident: PEOPLE are created equal. Man and woman, woman and man are endowed by their Maker with certain basic human rights. Among OUR rights are Life, Liberty, and the Pursuit of Happiness. To secure OUR rights, governments may form deriving their powers through OUR consent.

If in the course of human events, WE should desire to assume from among the powers of Earth, the blessings which Nature provides, a decent respect for individual ideas insists that issues of importance be decided by the PEOPLE.

By taking OUR money with OUR consent, OUR government's form must ensure OUR rights. When OUR government's form destroys OUR rights, OUR choice becomes to change the form or abolish it.

OUR challenge lies in finding a form with foundations built on such beliefs, and with powers arrayed in such a way as will bring about the happiness of the PEOPLE.

Rather than alter their long-established government forms, history has shown that humans are prone to bear unbearable wrongs. As caution decrees and reason suggests, such long-established government forms should not be thrown off for merely trivial causes. But, when a long chain of abuses pursues the same old dreary design, WE are reduced to tyranny.

To form a more perfect union, and in order to assume this awesome responsibility of Democracy, WE must guarantee OUR tranquility, encourage OUR wellness, and arrange OUR common defense.

We do this day ordain and offer this Basic Human Manifesto as our gift to all the people.

"A Third Political Party for the U.S.A."
