Mandela sets tour

JOHANNESBURG, South Africa — Nelson Mandela, recuperating from minor surgery, will probably remain hospitalized until the end of the week but is scheduled to begin a 13-country tour on Monday, officials said today.

"Mr. Mandela is up and about this morning and just fine," said Dr. Gordon Cohen, director of the private Park Lane Clinic. "I don't expect him to go home before the weekend."

The 71-year-old African National Congress leader was admitted to the clinic Sunday night for a complete physical examination that had been planned for some time, ANC officials said. During the examination, a minor operation was performed Monday, Cohen said.

Neither the doctor nor Mandela's family would disclose the nature of the operation, but Cohen said it was not serious and had no long-term implications. He said Mandela was resting, recuperating and receiving selected visitors.

Mandela's wife, Winnie, said after visiting her husband Tuesday night,

"If it wasn't for the crowds at his home, he would have been home already. But his doctors felt he should rest."

According to a draft program released today by the ANC, Mandela will visit 13 countries in Europe, North America and Africa from June 4 to July 18.

He will visit many of the European countries where South African President F.W. de Klerk met government leaders earlier this month.

Mandela's U.S. schedule calls for a ticker-tape parade in New York City on June 20, an address to a joint session of Congress and the United Nations General Assembly, and visits to Atlanta, Miami, Detroit, Los Angeles and Oakland, Calif.
