I'm amazed at the poor photography demonstrated at the speech by Gov Weldon Jan 5. Any amateur could have done better than to have a large map in the background for the Governor. The 'background' fidgeted - scratched his ear etc. while the Governor made a fine speech.

Then my next question - at the Senate hearing - that followed with Senator Sarbanes - why have the Chairman of the Committee in front of the door ⁱⁿ at the rear wall where various people go in and out - poor planning.

Very Truly Yours
