Dear Helen,

I was so fortunate to switch the channels when I did, and come upon the A. N. W. C.'s Helen Thomas Roast. And did they carry out the threat! All in good humor and lashings of respect for you, however.

But the one thing they missed was your talent at Weston Fagg. Or is this a look-alike? But I'm sure it's true to character, so that's why I am sending it to amuse you & maybe share with your friends and worthy opponents.

I've always been an admirer of yours. In fact I've called your office more than once, but you were out chasing news.

→ Is it possible to buy a video of the

event shown on T.V. C span (I think)? I want to hear the whole set of speeches again. I really enjoyed it and realized even more than I already did, what a talented and capable group of journalists we have, in spite of the few who don't deserve the description.

I wish you were on the President's cabinet to raise important issues on behalf of the public. I would say, "I wish you were President," but who could inflict such a penalty upon such a lovely individual.

Thank you for all the good questions you raised that we wanted to know the answers to. Love you!

Yours most sincerely,

P.S. In case you are curious about a stranger, I came from England in the early fifties, am a retired school teacher, now 77 yrs old, and still kicking.
