Dear Mr. Lamb & Staff:

I watch C-Span because it has the unique television viewing aspect of nurturing the body and soul with the nutrients which enlighten, inform, educate, and inspire our lives.

You provide the stimuli for hearing all aspects of what makes our Government of the people and for the people tick.

Since we are all products of the human race with intrinsic differences, I think that with common sense, common passion, unselfishness and a true sense of values we can learn to live with our differences in peace, security and understanding of individual, local, national and worldwide humanistic respective needs.

Thank you all for being numero uno in creative and viable broadcasting - make it fifty more.
Sincerely,
[REDACTED]
