Gentlemen:

We must disagree with your^{viewer} who refers, in your April 29 issue, to the music you play as depressing and funereal. On the contrary, your beautiful music is enchanting, engrossing, relaxing, uplifting, exciting and refreshing, depending on the mood of the listener. Our friends who watch C-Span agree with us.

We would appreciate it if you would identify (on the screen) the music and composer of the selections played during the electronic voting intervals. Please keep up your stimulating and literate programming and let classical music reign supreme therein.

Sincerely yours,
