age 63

I watch C-span because - Its an education in the ways of how our government works, such as congress, the senate or any other branch, whether a Republican or Democratic of our federal government works. Also on C-span call in program - I enjoy the various primaries you had, also for my first time I seen a real live caucus, which before I had only heard about - and had no idea of what it really was or did in reality.

I can also learn from C-span the various laws or amendments are being discussed by congress, whether passed or rejected.

I can also learn the thoughts of others on the call in programs - which way they feel about our country should go - One also can tell whether they rich or those, poor - retired, healthy, young and whether employed or unemployed - the little business or the larger one's are doing - when I listen to C-span I can learn more then if I'd gone through a course in school. C-span also host the country's best host and hostess that can be found anywhere.

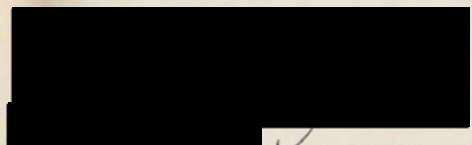

I also liked the democratic debates on C-span very interesting, it tells me a lot of about a candidate, which I would not otherwise have known. This way it isn't from a view or opinion from some other source.

But I still would find a personal visit to C-span - most Fantastic.
