Gentlemen:

DEC 14 ANSU

A Question —

I do not believe that the IRAQ people know or realize the awesome war force and war machines that are going to be used against them should war break out. Also like all dictators Saddam probably has hidden millions of dollars in banks or other countries for his personal use should he be overthrown. Why doesn't our C.I.A investigate this and then with the information they possess inform the Iraqi people about it, also explain the terrible results to their existence should the sophisticated weapons be reached on them. Suggest leaflets ^{over} be dropped to them.

Would appreciate using my question
