You had the "pompeus ass" Sam Donaldson on (could have been pre-recorded I did not notice) this man is such a "Smart-alec ass", the American public - or all the ones I know & talk to - think he is a detriment to the journalistic field! We have been in business for many years and come in contact with many, many people, so it is not just us but all of these people who think this way.

Here is the same ass who gave his location on the national air waves! He apologized? He should have

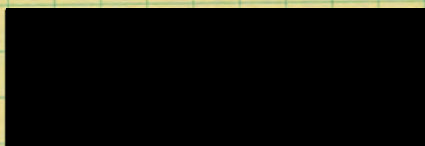

had his butt kicked & he should not get those kinds of assignments ever again! The American people do not have much use for either CBS anymore, especially Dan

Lather - Sam Donaldson is in  
+ getting there fast - we don't have  
much use - not one ounce of  
respect for them or their reporting.

All journalists anymore seem to  
try & get their opinions & what  
they think into their reporting -

When they should report the  
facts only. We are smart  
enough to pick our own  
side and make up our own  
minds without these "so called  
knowledgeable fellows helping us."

We are sure smart enough  
to know who the asses are!
