SERU 12/10/90

Dear Mr. Lamb :

" C " Span is the only National News media which gives both sides of a story or allows a non-liberal view to be aired .

I have written a book which I am attempting to have published called , " The Head of the Snake " which is very critical of our present form of Government . This book was not written for profit , as a concerned American who loves his Country I feel that a sweeping change in our Government must be forthcoming or we will rapidly follow the path of all Super Powers , Rome , Spain , England , Germany , and now Russia . (There is very little time left) . Financial and moral decay will soon make us second class .

All we get from Congress is rethoric , a succession of laws and ideas all with the same direction . Spend away our future on so called social benefits making useless drones out of half of our population .

Has there ever been a successful business where the President didn't have a line item Veto ?

I have often wanted to call you but the queries would be too long for your program . The enclosed material may be the basis for a format with our present leaders or interest to the public in general .

Thank you for being a voice in the wilderness , keep up the good work .

Very Truly Yours ,

[REDACTED]

Greensburg , Ky . 42743.

[REDACTED] .

There are only two things radically wrong with our Government , the Democratic and the Republican Parties . When our Government was crafted there was a shortage of educated people so no affect of the two party system was noted . The one principal that has been accepted by our country and the corner-stone of Democracy is the premise that our Government is based on is , " By the people and for the people , " that has now been changed to , " By the party and for the party . "

Look at the votes in Congress 229-6 is usual for any liberal issue by the Democrats and 125-30 for the Republicans against . This is a totally unexceptable form of Government . The American voter has absolutely no word in what happens . It is no longer the will of the people but the dictates of the party .

This is supposed to be a Democracy with one set of laws for all citizens . Mr. Mitchell stated on your program that every person in the United States including the President must obey the law . He as the leader of the ruling party embraces the law and repeatedly ignores the Gramm- Rudman Admendment which is susposed to be the law of the land .

Another group of facts put the Congressmen beyond the laws of our land . We the people go to jail for the same crimes that bring a severe reprimand to the privileged class , our Congress .

A Democracy with justice for all ?

This severe reprimand is just a lot of smoke to affect an aura of punishment . In fact after allowing a Congressman to commit a crime he has a cop-out that does not extend to any United States citizen . There is no room in a democracy for tiered justice that puts one class of people above another.

As leaders they are supposed to be the pinnacle of moral and ethical behavior instead they have their own set of rules . Take their salaries , they foisted Social Security upon the Nation then proceeded to make their retirement a plush experinace . Most member will receive close to a million dollars for their " Golden Years " while the ordinary citizen tries to exist on \$ 530 .00 per month with a tax hungry government down to the local level chipping away at them with taxes from every angle . In my city , in Kentucky as a Social Security person I pay in school taxes over \$ 600.00 per year and my last electric bill has another \$ 2.00 per month school tax placed on it .

They also have license to steal in various forms in the name of campaign funding which makes the election process a two tiered system . The incumbent has millions while a challenger works on a broken shoe-string . A Democracy ?

The majority of the people don't vote , they are not cognizant of all the

facts but they do know that something smells very bad . Then they look at the two party candidates and realize that the only choice they have is the lesser of two evils not a preference of quality . This fine distinction turns voters off and has become an embarrassment to our political establishment who realize that the vast majority of the people do not condone their interpretation and implementation of our Constitution which clearly states ; " by the people and for the people . " Not by the party and for the party .

Often heard on your program is the cliché , " vote the rascals out " but no-one seems to vote because they realize it is a waste of time and money . I have never heard anyone present the irrefutable facts of any election .

1 . One out of every six people in the United States works for a Government . This amounts to 16 % of the National vote . Job holders have to produce votes , lets assume that each job holder controls only one vote (this low estimate is a ridiculous assumption) . This now accounts for 32 % of the vote which is more than the turn-out of 99 % of all primaries and most elections .

2 . These primaries may have as many as five or six candidate but most are party clones that the party can support . If the winner turns out to be a person against the party (This happens very rarely) One party has been known to throw their support to the other party to prevent a non-party member from being elected .

With a total of 32 % that are paid to vote leaves a pitiful number of free choice votes . I get a little ill when I hear a politician make his winning speech , " I was elected by a public mandate " . In reality he would be lucky if he got 5 % free choice votes .

This system failed over fifty years ago and before we can throw the rascals out there will be nothing left to fight over . Twelve trillion dollars of debt now and our liberal congress refuses to cut welfare and pork-barrel programs to balance our budget . History has proved that raising taxes has never reduced debt , infact it encourages more spending . The only way to bring the budget under control is to cut spending .

It will not be much longer when the only way out will be a revolt of force because we cannot do it with the ballot . 229-6 votes in Congress proves without a shadow of a doubt that the party reigns supreme .

The final result is that two good party members vie for election to perpetuate a system that does not compute , a dinosaur from our distant past .

It is morally wrong to criticize without offering a solution . (Like our National News media) .

To elect these (229-6 , 125-30) clones take a look at the wasted money these elections entail . In California , in an off year election the Democrats and the Republicans spent an estimated forty million dollars each in an attempt to elect a Governor . Now add to this the untold millions spent by Congressmen and lesser officials . In California alone the tab must exceed two hundred millions (polling place etc .) This money comes from the people in one form or the other , pacs for buying votes , contributions of large lobbies for favors , in fact fund raising in all of its ugly forms . All of this costs the people because the favor getters pass it on as the increased cost of doing business .

Back in our present Congress the laws being passed could be placed into effect just by having the approval of the Democratic National Committee instead of the facade of going thru Congress for the Party Vote .

National elections cost untold billions of dollars with the same results . If the money spent on these useless elections was placed in the General fund we could approach a balanced budget .

I don't propose to change our Government because I believe that the two houses is a workable possibility but we must elect a Congress that is America first not party first . Our present form leads to stealing , thrift scandals , foreign loan defaults , drug cartels , affecting every portion of American life .

Now we have politicians attempting to run the largest business the world has ever known , whose first elegance is to his or her party .THE RESULTS ARE A COMPLETE DISASTER .

Outlaw lobbying in any form.

Eliminate party politics .

Eliminate all electioneering , our National press has killed any chance of free fair elections .

Have seven candidates (arbitrary)

For the house . Limit of two four year terms .

1 . Have the farm bureau select one candidate .

2 . Have the better business Bureau select one candidate .

3 . Have the Kiawanies select one candidate .

4 . Have the Rotarians select one candidate .

5. Have the Bar association select one candidate .

6 . & 7 . Two members of the state houses or present incumbents .

(selected by the houses by majority vote .)

Now we compile a dossier on the seven candidates and mail one packet to every registered voter . Inclosed would be a computer card to be mailed back with the voters selection . We now have a choice of candidates that have strong desires to further the values of being an American . They have already proved themselves with public service . Our election turn-out would approach 80 % instead of the 25 % - 35 % of paid jobholders that we now have .

We would also have some business leaders in Washington , lord knows we need them . Make party clones a thing of the past .

For the Senate .

Two six year terms .

Two house candidates proposed by the house .

Three present or ex-Governors , Senators , Representatives .

Two incumbents or maybe one outstanding personage (public acclaim)

Use the same approach for President .

Two Senators (proposed by themselves) .

One outstanding public figure (if available) .

Three present or ex Govenors , (maybe one Represenative .)

One incumbent or Vice President .

The people elected would only have one election debt-the people who elected them . Now we have Party Rulers with an insatiable party appetite for patronage with a moral blank when it comes to raising election funds to perpetuate the Party Dynasty .
