Grangeville, Idaho 83530 4541 OCT 21 91

It is not "exceeding peace," that makes me bold, but calling in was out of the question everything about me is OLD-

When people called in, and said Anita Hill was acting like a "scorned woman."

I knew right then, it had to be said - women are scorned -

I found that out - when the Vietnam war was fought - the male leaders in governments, never ask the mothers of the men that do all their fighting for them - whether they believe in fighting wars or not. They just become dictators, and make themselves appear to be conceited asses that believe they have a corner on all the brains in this world - what women think and believe does not matter. I decided then, and there, to make it matter. I did not raise my son to be one of their trained killers. I had put a lot of effort into bearing and raising him. I had tried hard to make him be a decent civilized human beings.

How effective could a one women rebellion be when it was up against the second coming of Goliath. Males that believe in

doing all the killing that men do in their male fights are cells in Goliaths body - they do not know what gives human life its value. The human brain, the human mind, is what gives human life its value, and what is being put into it by the male leaders, his communicators, his educators is what makes all the difference - men in their male fights, have been destroying humanities most valuable asset - human minds, they can think, reason, learn the truth and that is where humanities salvation lies, in the human species having brains - minds that can do that.

There could never be too many human minds working in the solving social problems business - the more people thinking about human problems of any kind the sooner they are solved. No problems are isolated cases -

Under male management of human affairs too much thought is being given to making money - sure, it's needed where the human species has needs - but when human minds are being given to making money, they cannot be given to doing the kind of dedicated study that leads to knowing the truth, basic truth, like the truth about humanities leader, the male. That is why the love of money is the root of all evil - its a human mind preecupier that is keeping the American people IGNORANT.

male leaders are IGNORANT - they have to ignore what all of naturtes other evil forces do to humanity to be able to believe in letting human males do all the killing they do in their male fights. They keep putting the seal of approval on doing all the TEN laws tell people not to do, by doing it, then they are not in a position where they can say doing it is wrong.

Women do not have anyplace to go "to petition governments, for a redress of grievence - where the problem is the male and all the governments are being run by men - It is the TRUTH ! male leaders are using MIND control.

Oct - 14, 1991

I do not have any kind of credentials - I think, freed speech and press would make the American people responsible for getting all truth learned and all beliefs based on it--- so what needs to be done is, get speech and press freed from male control- I am a first time caller- we just accessed C-Span, recently, and I think - its great- its letting a dream come true- its making our government, more truly, of, by and for the people- the people are speaking.

The only trouble with that is- humanity is brain washed- the leaders in religions and governments are men, males of our species- and when the problem is the male sex, the uninhibited sex that is never caught with the goods, it costs males nothing to become reproducers of human life, and they are not so handicapped by their off spring as the human female is -

Women have no place to go to petition governments for a redress of grievance because the governments are all being run by men

men experience living as males, it gives them a male point of view that limits their social vision, they are not women
Our government is not a representative form of government because males cannot represent females any place they are not females.

What Anita Hill is doing for women is- she is making men aware of the fact that another sex exists and in the human species, the females have minds of their own and they experience living as females of our species- they have a female point of view that has been suppressed by the males belief

Humanity is brain WASHED_ ALL IT KNOWS TODAY IS WHAT MEN THINK AND BELIEVE

More power to the Anita Hills-- we need more freedom fighters that fight to free human minds from male control.

It has gone on long enough-

Where the male has gained control, like in the world today- because males are not as handicapped by their off spring as women are

its a male monopoly where male leaders are using mind control
what gives the male a right to do it when he is

just the one sex- not both
of them . It is not one of mans inalienable rights when in our species the females has a mind of her own . We stand no chance at all of ever getting human intelligence raised off of the level its being held on by the male leaders belief in doing all the killing human males do in their male fights that are called wars. Its all the excuse, the women that abort human life need- If male leaders were better social world managers if they could get humanities having peace on earth insured, if humanities lot had been improved by the males beliefs- people would not be so interested in getting to heaven and women would not want to abort human life-
It can be looked at that way to.

My chief observation in living 84 years, right here in Central Idaho a fourth generation American, is - The male of our species is using MIND control. The leaders in religions and governments are men. Their male fights make it so evident they are typical males. They have male instincts that their brain cannot control. That is why we have restraints like laws, why some so much wiser than most - the men wrote the Bible. It with its laws tried to get the males, male instincts controlled so male leaders would have to think, reason their way out of their social difficulties, - solve their social problems that way.

males gaining control because they are not as handicapped by their offspring as females are - did not do the human species any great favor - because males fight in trying to gain being in control, they do it, animal and human they males want to be in control because it insures their getting all their needs met - that becomes the main object in living after the reproducing instinct gives them life - but human males doing it - all the killing they do in their male fights, that are called, in their case, wars

lets us question their intelligence, their right to hold the leadership position they hold, their right to control human minds and lives with their male beliefs old established male beliefs - some of them are called religions - in them we have the males versions of god - nothing forces male leaders to base their beliefs on THE TRUTH and nothing insures any of them being based on it.

It is what the American people could do for all humanity, if we could get rid of male control - work at getting all TRUTH learned, and all beliefs based on it.

men wont give up without a fight because they are the male of a species that has the same needs and instincts the other species have. The species need what it takes to stay alive, - its one of natures dictates - it obeys natures dictates in becoming a reproducer of its own kind

and then its time and mind is given to raising offspring that have the same needs and instincts their parents have - That is why the male of our species has been taken so much for granted. he could not be studied, like he should have been studied, from our species beginning - so he was trusted, his MALE beliefs have been accepted and allowed to influence humanities thinking and we are all trying to exist in the result - we can hold the male leaders in their religions and governments responsible - Our social problems are all due to the fact that they have never studied the human species enough to understand its nature, the great sexual difference in the males and females of the human species, their needs and relate that to this earths resources -

The male leaders have established their male beliefs and everything written and said - to be acceptable - where male control is so complete must follow their given lines of thought. Speech and press have never been free they are being controlled by the males old established male beliefs and the love of money

Knowing the truth about the human species, its leader, the male, is taking first things first- It is the study that should have taken top priority in doing studies in our species beginning- it was not done because trying to survive and raise off spring took too much time./ Humanity has always been up against nature evil forces in trying to survive on planet, earth.

Its is interesting to note what is make the big difference, now- mans instinct of SELF preservation makes him a great inventor- he invented his religions, his male gods, heaven to make living on earth bearable and what he does to humanity with his not based on tthe truth beliefs, and his male fights acceptable. when he could no lonmger use slaves he invented labor saving devices that have FREED human minds. They can now be given to studying humanities leader, the male- the truth about him can be learned and our social world will never again be the same.

Some one called in and said- the Hill Thomas problem is destroying our nation- it needs to be destroyed, so it can be based on a male females foundation where as much input in managing human affairs comes from the mind of woman as comes from the mind of man.

America has never been any different its a male run male managed government, like all the rest.

Women make themselves responsible for human life when they let it be born. It is a responsibility that gives women a right - it could be called a GOD given right to be more involved in managing human affairs a right to have a BIG SAY in how human life is to be treated on earth-

The females rebellion has only just begun

Where the male gained control- the name of the game for human females had to be " man pleasing where the male has proved himself to be such a mastercraftsman at creating hell on earth-- its making women THINK- do they want to bring children onto this earth where the human species suffers what it does- when human males are this worlds worst killers- worst because they do have full awareness, human brains, minds, they can think, reason- whats been holding them up ? Why aren't they doing it ? I Have a theory- I hope its not the truth - the human species is a brains instinct combination that has more instinct than brains- what else explains its having to be restrained by laws like the Bibles TEN, laws and government- what else explains men writing the Bible. If the instinct, in all people, all people have it - that makes them kill, lie, covet, steal and commit adultery was as the TEN laws say it could be in all people, all people have it- it is all the protection anybody would need- nations would not need defense departments- It would go a long way toward getting humanities having peace on earth insured.

Human females have brains, minds of their own why shouldn't they be philosophers and have their females versions of GOD. The males versions have

never come close to getting humanity's having peace - on - earth insured

I think male leaders want woman's mind controlled by their male beliefs because they do not want it competing with theirs in managing human affairs. Control means everything to men- I believe they use their religions in trying to prove they have a right to use mind control.

They are afraid of the human mind's fact-finding ability because facts learned alter beliefs. Male leaders that have gained control do not want any facts learned especially about the male of our species that would make him lose control.

Male leaders' great fear is fully exposed in their wanting all human minds controlled by their old established male beliefs. Beliefs that were established when few people could read and write and too much time had to be given to staying alive and raising offspring.

Man's fear is not justified fear because thinking people know the male is not his own creator- he can be forgiven, he never made himself or gave himself his evil male instincts that his brain is not able to control. We are a species that never asked to be given life or placed on this so mean to people planet- we are here and our common enemy is in what all of nature's other evil forces can do to us. They can be better fought by the human species working as a single unit and maybe it could forget its differences, take off all the labels and put all its fighting effort into taking on its common enemy- what all of nature's other evil forces do to the human species. A common enemy can make allies out of really bitter foes. It has always worked that way- if women becomes the common enemy and says to man- stop doing to humanity what you males have always done to it in your male fights- would that work?

Could the law "thou shalt not kill," become a BIG STICK in the hands of women because males doing all the killing they do in their male fights breaks that law. It just might work.

Forwarned, for armed.

I make lots of mistakes in writing- and I am not posing as any kind of "divine authority." I want speech and press freed from male control so our nation can have as its mission- getting all truth learned and all beliefs based on it. It could be the servant of all nations, that way and therefore- the greatest of all nations- Will the male be civil and let women take on the responsibility that is given her when she lets children be born- or will she have to fight him because he is not able to see the reason why he should do it- it would work in his favor.

No mistakes anybody makes could ever equal the mistake human males make when they take a hand in the killing business on this earth that hates humanity- it tries so hard in so many way to get rid of it. Its an earth that is full of evil forces that cripple, kill, destroy human life and its the human males being the worst of its killers that that calls for an investigation of his male beliefs .

If male leaders had any sense , if they had more brains than instinct they would pool their brains, forget their differences, look at we the people, as males and females of a species- take a good look at what we are up against in what all of natures evil forces do to us and maybe could ssee the logic in the law " thou shalt not kill. "

If male leaders had more brains than instinct they would pool their brains and pit them against what natures other evil forces do to humanity-

What male leaders do turns the reproducing instinct off in men and women to produce all the sex problems we have-

When men take their young males and they make them have so little regard for human life they can do all the killing that has to be done to win mans male fights for him- it produces a big crop of criminals- men that have little, regrd redard for any human life other than their own.

War does let us question male leaders intelligence.

What difference do Supreme Court judges make - where male leaders are using mind control-? How just can laws be in the hands of a species that has to be restrained by laws ? TRUE- the Bible was written by men and it is based on THE TRUTH because our species kills, lies, covets, steals and commits adultery and if you do not believe it- you have not lived on this earth very long-

It stands to reason - the will of its God was expressed in the TEN laws, that say dont do it - Christ was that lone JEW, that didnt do it- he made fulfilling the TEN laws His mission that got HIM killed because it exposed error in the ways of male leaders that wanted people to believe they had a right to hold the position they held, a right to control human minds and lives with their old established male beliefs-

The error still exists- human males have always been human males men still break the law " thou shalt not kill, " It destroys the TEN instinct inhibiting laws because it proves the male leaders in the males Bible associated religions have never trusted this God and Christ enough to prove their love in the way Christ did by fulfilling the TEN laws- Male leaders could always lieto to humanity and mislead it because the human mind could never serve the two masters- it could not be given to doing the kind of dedicated study that leads to knowing basic TRUTH. like the truth about man, humanities leader when it had to be given too much to obeying natures dictates in getting what it people need to stay alive, become reproducers and raise off spring that have the same needs and instincts their parents have

Oct-13-1991

We are attending social science- social studies classes
C- Span would be the greatest- it could make our government - of by and for the people, by letting the people speak, like they are doing now but there is just one drawback- one fact that has to be taken into consideration in dealing with Thomas, Hill problems

The leaders in religions and governments, everywhere have been men, males of our species - Our social world is a male monopoly where male leaders

are using mind control It has been going on from our species beginning because males are not as handicapped by their offspring as females are
Such absolute male control leaves women with no place to go when they want to petition

governments for a redress of grievance when the problem is the male of our species.

Males experience living as males, it gives them a male point of view that limits their social vision- they are not women. In the human species the males and females have human brains, minds of their own and very different sex natures that give them very different points of view- so why should the male be controlling the mind of woman with his male beliefs?

What gives him a right to do it ?

How can speech and press be free where the male is using mind control -

Where the leaders have always been men- it has to be true human minds and lives have been, they are being controlled by the males old established male beliefs that have never come close to getting humanities having peace- on earth- insured. the mind of the male has been tested and tried, its been found to be wanting in more ways than just this one- trying to get the human males mind to come up with a plan that could get humanities having peace insured is like trying to gather grapes from thistles. Man is male he has male instincts that can overpower his reasoning power that is why we have laws, government why men wrote the Bible but where all the leaders are men- we have the " fox guarding the chicken coop. "

band together like musk oxen of different colors and beliefs- would human males stop fighting each other

proving they are typical males if the female of our species becomes the males common enemy by just saying NO to his sexual harassment, what he does to humanity in his male fights that are called wars.?

the male sex is the uninhibited sex, that is never caught with the goods it costs male nothing to become human life reproducers and they are not as handicapped by their offspring as woman is- men and women are different and its a great difference that has never been taken into consideration in managing human affairs.

All the input in managing human affairs has been coming from the males mind- we can see what kind of social world his male beliefs create. Get rid of male control and C span could help the American people fulfill the mission that free speech and press gives people that of getting all truth learned and all beliefs based on it- male control is keeping us from making progress in doing it-

More power to Anita Hill- I see her as a freedom fighter--- a leader that will eventually beloved and appreciated by all women- the fight has to be freeing human minds from male control -
C- Span- something is jamming you in our part of the country

You are the greatest - this service cannot vbe matched because its making our government- of, by and for, THE people. The people are speaking- at last but there is a fact about all this that has to be taken into consideration

We are living in a male run society where the leaders in religions and governments, most of them are men. the rest are brain washed women- that know which side their bread is being buttered on where the male is so in control.

It is a FACT that has got to be taken into consideration when we are dealing with social problems, like the one that is before us now.

It is a male run sociaty- the leaders are men.

Anita Hill is a catalyst, a woman leader that will eventually be appreciated by all women because what she is doing centers attention on the males conduct

Males experience living as males, it gives them a male point of view that limits their social vision. They are not women. Their right to control human minds with their male beliefs- some of them are called religions, in them we have male versions of god. Nothing forces male leaders to base their beliefs on the truth, nothing insures any of them being based on the TRUTH Male leaders right to use mind control has got to be challenged- because man is male- just one of the sexes
It is what America could do for all humanity, if its people have free speech and press but how can speech and press ever bee FREE when the male leaders in religions and governments are controlling human minds with their old established male beliefs

Its impossible.

The people that are speaking, today. the majorityof them , are brain washed. Their mind and life is being controlled by the old established beliefs of male leaders, they are not aware of that FACT

If our people had free d from male control speech and press if we could get human minds freed from male control

- we could work at getting all truth learned and all beliefs based on it and a basic truth is the truth about the male of our species
That could be this nations mission. It could be the servant of all humanity that way- and therefore, the greatest of all nations.

The reason why we have got to get rid of male control is because- the shape our social world is in, today is the best that the mind of man can do. It had plenty of time to get humanities lot on earth improved but trying to get the males mind to come up with a plan that could get humanities having peace- on - earth insured is like trying to gather grapes from thistles.

Where all the leaders are men- we can hold them responsible- and it has to be true- our social problems are all due to the fact that the mles males mind is not up to knowing how to manage human affairs.

It has been tested and found to be wanting, in more ways than just this one

It must be said - males are in control.

It's a male monopoly - ^{male run} society
where male leaders in religions
and governments are using mind
control - Today's women are so brain
washed, they cannot make any
difference -
