Cigarettes were Taken off the air over 20yrs ago, (I also have Emphagema To No Smoke 4yrs) while few people will still deny smoking is not a health problem it is no wheres near the murder that alcohol is. while I did damage myself with both, I never got put in jail for smoking, stole, lied cheated committed act of violence, Tried or did kill some body for the want of a cigarettes

Brightness Bennett Bungling Billion are BULL, so is the way most of the way the new media portrays this problem Especially over T.V. Just get the offender lot of Times just younger people, throw them in jail after the arrest and that all it Takes 70% assets To apprehend the Violaters 30% for Detox and Rehab centers. Bennett is the some to the drug problem as James Watt was for enviromentalist in the Reagon Era.

Most people that do not have the problem have no idea that relapse is a part of the disease (dis-ease) and that while many

one thing this great Goverment of ours (5)
is going to have to consider, if they really
want to help the have nots? Before this
country can have any other sort of
reform, they are going to have to have
some sort of social Reform for every one.

I believe it was the Billionaire Mr Forbes
who passed away recently that had an
interview on T.V. He had went to an
average high ~~sch~~ school (integrated)
and told the students IF they could.
Stay away from Drugs and the girls
didnot get pregnate He would see that
they could have any college of their
choice and go as far as they could go
in their field of interest. the students
went from e-D-F's to all A's and B+
(Because they had a future they dist not
have before?)

along with the social Reform we are
also going to have to have some sort
of justice Reform

meaning before any of us can have much faith in our Goverment this JOST-US has got to go the common person would be slapped in jail at once John Towers and Jim Wright did not even have to answer to any thing they did not want to instead they resign at FULL PENSION RIGHTS, all investigation STOPS, is this fair to any of the rest of us?

I now have a couple of questions that I did not get an answer from the represnatives I contacted

Tons of the white filth cocaine come in to this country all the time, some of it by small aircraft that could land about any where in the U.S. what if these planes were carring small A-Bombs that were strategicaly placed and could be detonated ~~by~~ similtaneously by satilite?

One other question, why less people turn out for elections except the lobbiest, just how is it the electoral vote works? Gov DeKanks was no prize but he got 43-44 % of the popular vote Yet carried only 1 or 2 States by electorial vote In no way is the popular vote porportional to the electoral vote, and 2 wks before the election Bush had already been declared winner, so with tougher Laws on voter registration Why Bother To Vote?
