Att. Brian Lamb

Dear Mr Lamb,

I was pleasantly suprised to receive such a prompt reply to my letter of 6 Jan and I wish to thank you for consideration. also, thanks for the U.S. CONGRESS HANDBOOK. I certainly had not expected a gift after I criticized you so severely

Now that I know that I had the right address and you do respond to comments and "hopefully" suggestions, I would like to make a request. There are two extremely important subjects that I feel only you, with your wide viewer audience, can really inform the public.

The first is the worldwide problem of over-population. Unfortunately, this happens to be a very controversial subject with religious overtones, but any rational, logical thinking, person can easily see that virtually all our world problems relate to excess population.

The main problem that comes to mind is environmental polution with dirty air and water as well as the ozone layer. We are faced with ever greater food shortages and the 10 million persons that now die each year from starvation will continue to increase. Even war is hinged on a people's need for more territory for an increasing population.

There are lots of books on the subject, one that is now outdated is "The Population Bomb" by Dr. Paul Ehrlich. But the message told then is still viable today. Perhaps you could have the author of a book similar to this on one of your "call in" programs.

My second proposed subject is not as critical to mankind's survival but it is important to all Americans that believe they should know how their government operates. I suggest you obtain, and read a book titled "Report From Iron Mountain On The Desirability Of Peace" by Leonard C. Lewin. I didn't know such a book existed until just a few months ago and I still find it hard to believe that our government would fund such an immoral study.

I would have dismissed the "way out" ideas proposed as crack pot if they didn't fit in with the various actions

taken by our government in the last 10 years or so-the book was written in 1967. Star Wars is one of the plans suggested to keep our war activities alive. Also, our invasion of Panama fits the books suggestions to a "T".

Perhaps this item is "to hot to handle" and if it is I will excuse you for not exposing it. However, I do think this information should be made public and no other TV channel, Radio Station or written form of media can match you for nationwide impact.

Once again, thanks for your recent reply to my earlier letter and the Handbook.

Sincerely yours
