C Span -

I first heard of C Span in Port Huron, Mi 48060 September and my ears and eyes have been glued to this station ever since. Thank you for being here. Your station and C N N have made me hopeful for USA.

I thank you for your coverage of the Houses. Because of it I have a heightened appreciation of the complexity of the Representatives' task and of the conflicts of interest they deal with.

I am learning the protocol. It is amazing that they get anything done. Some people say "Thank God they don't".

I think if we really listen we can learn an enormous amount - with very little effort. They are up on their home work. I like learning about both sides of a question so I can better come to decision.

I admire the members of the House for standing up for their beliefs against enormous time pressure. I wish they had done it five months earlier - but perhaps they hadn't formulated their beliefs at that time.

I'm glad you let all kinds of speakers have time. Sometimes I can't understand them at all but your interviewers treat them all with respect. There must be hate groups which are excluded, because some people can only relate to such haters. I would welcome the input of religious and psychological individuals to analyze and interpret the motives of hate mongers and give reasons for their existence.

(over)

I was getting so tired of the trivial character of much of the content and the prevalence of advertizing on "regular" programs that I rarely listen any more. Religious programs seem to demand orthodoxy according to their "lights" - There are exceptions - My husband gave up and listened only to Mr. Rogers and the games - Thank you for a welcome change and opportunity.

Thank
You
