Dear Mr. Lamb,

Its very sad what America has become and millions of people around now have no idea of what the best of America need to be. Last week on the last few minutes of your show, a man called in to call Clinton a psychopathic liar, I don't believe he is to that degree but he is a master at it and an expert on deceit and by nature a hypocrite, which is part of the liberal mind-set, how good they are at it, from the Hollywood elite. I do commend C-SPAN in its efforts to be unbiased. So much of the news media know just how to slant and twist the truth. The truth is the truth is the truth and that's when opinion takes its place. Lying is part of the political game, but Clinton's campaign was so full of it and seldom disclosed. He said he was a Centrist, the big lie and he got away with it. He and his people are liberal socialists, what his term and politics are about, is divide and conquer and its happening

Also on your show a woman called in ranting & raving about people who have a different view from her. I hear people ~~people~~ like that all the time. The liberals have had their way so long in our higher education, the lawyers the mass media and Hollywood. What they hear now is what was the silent majority, the apathetic, we are the real America and the liberals are out to suppress and oppress our views and rights. They scream call us names. It began in the sixties, we have heard the loud mouths much too long. Even the FCC another part of big brother flexing their controlling insult. The left wing have the power now with this president, if they don't silence us now they have lost it. Many politician and the president want to be our masters not our servants. They are at war with the real America and now re-define what & how they want America to be, it is so obvious. Thank you for letting me, one of the silent ones fight for, and take the Real America back

Sincerely,

[REDACTED]
