

245-90

Dear Sir:

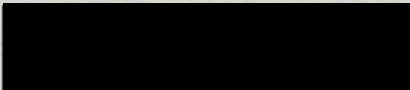

JAN 18 REC'D

JAN 18 ANSD

There was a professor that was on C-Span that missed the whole point of a call. The caller in order to get a balance of news had to get about 9 publications. The prof. responded, "Only in America!" What the caller wanted was news that presented news in a balanced way from 1 publication instead of having to go to the extra expense. On another C-Span, there had been 2 men that made statements that I do not think reflected what took place. Neither said anything about side effects in state and federal and local for media had and still has its own agenda to push. To sit there and say the media has no effect in last

elections is not true. Bush got
elected by hammering of Horton.
Since the presidential election,
I was glad and sad at same time.
I was glad to see attention
being put to furlough but sad
murders being put out on streets
and killed again.. who were out
on furlough. You repeat an idea
often enough, hard enough and
long enough it will have its
effect. Sometimes the effect
may back fire because the
public rebels at how uneven a
situation may be.

Sincerely,

Sumter, SC 29150
