REF:

Dear Sirs:

About 2 months ago, on one of your call in programs, you had a college professor who had just published a book on the new republics that were once part of the USSR. I think the title of the book was 'Fire Along the Rim,' but I have not been able to find anything that sounds like that in any book stores, or the public Library.

I know you all are not in the information business for those of us who cannot get the writers name, or the correct name of the book, but if there is anyway I could find out this info so I could obtain the book, it would be greatly appreciated.
