Dear C-SPAN,

I still listen to your programs daily. I see very little, but I hear everything. You get better as time goes on. Some of your guests I don't care for, but others are very good. I do wish you would have someone on there sometime that would talk about social security. Your call-ins seem to think they pay the whole bill, when employer pays half, and everybody, unless they are millionaires, draws xxx more money ~~that~~ than they put into the program. It's a revolving program. I believe S.S. should be taxed as civil service is taxed. Maybe have a limit to the low-income people.

I am very tired of hearing those people on your program talk about middle-income people. I am middle-income, and I was no lower than they are. It's getting to be a class U.S. I voted for Clinton, but I am not an R or a D. I do not like his tax plan because it will not promote jobs. That has been proven year upon year. But, the president is trying, but

it takes time. He is going too fast. Health Insurance is a big headache. They need ~~an~~ one standard policy with branches for different situations. Premiums have to be reasonable, and everybody should pay something - not depend on gov. to pay the bill. On your call-ins on health insurance, everybody wants their condition covered - that's not possible. I suggest a pool of companies & gov. for catastrophic insurance.

Keep up the good work, and I'll keep listening (even though on Fridays it's 5:00 A.M. in Oregon.) Your covering of the House of Reps. is like going to a circus.

Sincerely,

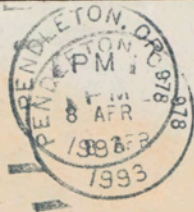

[Redacted]
