C Span.

Thanks for the info. I'm sure you do the best you can. But I wonder some times about your call in programs. I've noticed that at times, if some one asks a question or makes a statement that might not be to the best interests of the present admn. or some politician. It will be disregarded. One way is to go to a station break. As far as contacting the guests on your program, it dont work. A person may be able to write them but they want and dont have to answer. But thats not your fault.

How ever, If you ever get any of the agents that were involved with Waco on your program. Ask them about the bullets they put on display the large one looked like a 50 Calibre if so where was the gun. There should be photos of it and the base it went on. Unless things have changed, a 50 wasnt something you fired from the hip or shoulder

Another question. Why wasn't David
Hersch picked up when he was out of
the compound. Before there was a raid
planned, I'm sure they could have. It
might have saved some lives. It's a
known fact that he went to town every
once in awhile. You see, a hearing
put on by politicians is usually an
example of incompetence. Buddy Buddyism
and general misinformation. Just my
opinion folks. I believe any hearing
should be put on by people entirely
outside of Washington D.C. It might
turn out more accurate.

Durango Colo 81301

P.S. This latest hassle about cigarettes as
addictive. How about alcohol or are there too
many winos in office?

I know you cant answer those questions
but I thought I'd ask any how.
