C Span:

You have persons hosting talk shows, where people call in and ask questions.

I wonder why none of you have caught on to what people are asking?

Do any of you know what the hell Free Trade is? Free trade is one nation selling to another nation the products of his nation.

This though is not what this Free Trade World that the United Nations is proposing is. This so called Free Trade World is comprised of a 3 nation owned world. These 3 nations are England, America, and Japan.

My first question in this portion of the scheme asks why Japan would be the 3rd power in this, China would be the more logical

2.

3rd partner even if it is communist?

Free Trade is not international ownership of business. This in its self says something's wrong. I would give you a little example:

My son gave me a birthday card. It was a Hallmark. It was printed in the United States assembled in Taiwan, then shipped back to the United States and sold. This is economics?

This would indicate that cheap labor is the cause. International trade is not the issue because these nations all ready have free trade.

Then why would someone take on a partner in there business and relocate it else where? This would more be like someone trying to creat a closed market for themselves. Look at what has done this, automobile industry can only sell so many cars anywhere, and if you

are asked to be come part of this 3 nation trade organization, what do you get out of it, with the world to trade in?

Now heres something else for you to look into or ask about and I've wondered why one of your own personel didn't find it? Why did Bush, take Jacoca to Japan with him? Crysker all ready had moved to Japan and was building his car there.

What was he doing there checking on how much money he was getting?

I say that Congress, the Senate and the President are traitors and have writen and told them so. I wish I knew how, I could have them charged with treason.

I wonder to if the bullet train that epists in Japan is Amtraks, contribution, with tappayers dollars. Now Amtrak is back in the United

4.
States asking for taxpayer dollars
for a fast transit train from St.
Louis to Chicago through Bloomington.

Now we have telephone and
communications systems moving
out of this nation, I wonder
where there going, perhaps to
this new Intellectual Community
in China. I wonder how much
of this nations tax dollars
went into this.

All of these nations were
Industrial nations before this
so called Free Trade World
came into existence. So you tell
us whats going on. Grand
theft on the largest scale you'll
ever see and using the law
makers of a nation to do it.

I wonder if any of you noted
that the Presidents Budget had 2
large sums of money called for but
were not allocated to anything?

Then an ultimatum for a passage
date?

To hear some of the press talk you'd think that they believed the whole human race was a sleep, and they could say anything they damned well please.

One such person Jose Correns Carlson from Mexico who stated people wouldn't understand this world of free trade. Of course people that hurry across the border into this country to get jobs or persons that sell there time for 30¢ to 50¢ an hour don't understand but I'll tell him business that moves into his nation for cheap labor do and so does he.

So hows integrity these days stomped in the dust and walked on. Then you have Keith Morrison, one smartass if I ever saw one.

Why would a free trade world that is buying its way

into existence to be the governing force of the world need a peace keeping force. Maybe to use against the people that don't want to go along with there 3 nation world.

I don't think you people watch your own programing and I don't think those that cover the U.N. know what there hearing. Perhaps there to dam busy with there cameras and microphones.

Do you know the best way to do something slick is to do it right under nose, because people don't listen to well or there minds are on other things. How do you think cow artists get away with what they do.

Thank you

Bloomington, Ill 6/701

7.

By the way I all so wrote a letter to John Majors of England and called him a traitor. Then I all so wrote a letter to one of his opposition party and told him what John Majors is up to.

Now you think this isn't the cleverest scheme you'll ever see, then you haven't seen it.

Thank you
