Clinton

there's a vast difference between being Wishy-Washy and being flexible and realistic.

Conditions and circumstances change - so what may be the right thing to do now may not be the right thing to do - later on.

It takes flexibility and intelligence and courage and honesty to be able to "change color" when necessary.

I believe we now have a President who has the intelligence and courage to 'change color' when and if necessary and this is being intentionally and sometimes unintentionally misinterpreted by others as being 'wishy washy'.

Bill Clinton - also - has one distinct advantage over other former presidents - he has free & very astute help from a wife - who is probably 'smarter' than he is. I had no doubt that the Crime Bill would pass (over)

and I believe that ~~the~~ a
Health Reform Bill ~~with~~ with
some change thru bargaining
with the few Republicans
who are really sincerely
trying to 'do what's right'.
Dole is not one of them.
He is an ego-centric-die-hard
Republican who wants to be
President.

In closing - it is obvious
that Clinton is fortunate in that
he has some very intelligent
Democratic leaders in both
houses of congress - who are
astutely "directing traffic and
putting out fires". ~~They saved~~
~~his ass~~ on several occasions!
~~several occasions~~
