Dear Sir:

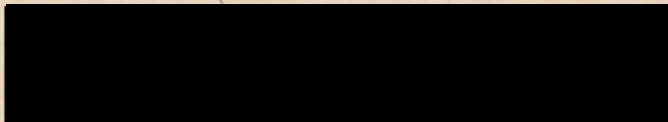

I am writing to you as a last resort, having contacted various departments at the FCC and their publishers at ITS without success.

We live in a community serviced by Summit Cablevision in Seattle, and do not receive C-SPAN. I was wondering what the new cable regulations say about public service programming, and if there is any regulation (such as a percentage of the cable company subscribers requesting C-SPAN coverage in writing) that would induce Summit Cablevision to include C-SPAN in their basic programming package to this county.

I would very much appreciate any information, as I consider your network to have the only programming worth watching.

Sincerely yours
