" C " Span .

400 Capital St .

Washington , D.C. 20001.

Att : Mr . Brian Lamb .

Dear Sir :

Often I hear you say , " please , let us hear your comments about our programs . "

I wish to thank you for showing our Congress in action- or lack of action . One thing stands out , it shows that the seven hundred elected- selected personages rule this land . Their voice as stated in the Constitution is the shaping of our policies , the law of the land , The decisions they arrive at on any controversial issue is strickly along party lines who vote 98 % for his or her party , not what is best for America . One thing that is common knowledge is the fact that the Democrat Liberal East has ruled the House of Represenatives for the last one hundred years and that no one including the President can spend one dime without the house's approval . As Harry Truman said , " the buck stops here . " I watch the Democrats play posture politics . Sure a Presidential election is just around the corner . Vis - once again the Iran Contra affair . Congress is going to spend untold millions more to collect votes . This money could better be spent sending drug dealers to jail that are infecting our children in school with inpunity .

What is more disturbing is the fact that the Majority keeps passing fantastically expensive bills passing down largess to the gullible public knowing full well that the President must veto to maintain any pretext of financial responsibility - more votes . They are wasting months of time instead of getting to - gether with the Conservative minority to hammer out reasonable legislation . They have once again put politics above America's needs . America is already deep in a financial disaster that threatens the country that we love .

Are they egotistical enough to think that when we go under they will emerge as the ruling power ? I have news for them , the half of the country that doesn't vote because of rigged primary

elections give them no choice are the same people that pay taxes and work two jobs . They are fully aware of Congress's lack of constructive action . They also know that Congress sells their votes to the highest bidder . They are fully cognizance that the party comes first . This will result in a complete power change and they will be fortunate indeed if they physically survive . God Help America .

What has happened to our Constitution ? " By the people and for the people . " This has long been changed to , " by the party and for the party . "

Let us take a profile of a typical Congressman . He became interested in politics for one of two reasons , one , he could help, an idealist who thought he could be an asset . Two , he reconized and wanted power along with a lucrative life style . They became involved with working for the party usually with a political job ( Patronage ) . The fast track at this point is law school but some devoted their time in securing votes . Both will rise based upon talent or backing . In either case he is taught that his success is based upon finding jobs for his party to perpetuate the vote base , he also recognizes that he must back any law his party wants . Money must be found and passed down to assure a viable party .

He has now risen to the point where the party decides he is ready for elective office . He is put up in a primary election for state office . The vote turnout is usually between twenty to thirty five percent which is exactly the amount of paid job holders who are paid to vote ( their jobs depend on it ) . The net result is a runoff between the Democratic and Republican party member .

Now he is under party scrutiny , if he performs , sends patronage back to his party ,be it jobs , or favorable laws for insurance , construction etc . Money from lobbying is a must, he is now fully conditioned and may be selected to run for our Congress .

If elected his first priority is for the party that elected him . The second priority is for the various lobbies that provide him and his party with untold billions . Some examples are Japanese Conglomerates and B C C I banking , insurance , on and on . Lobbying

is a trillion dollar industry who's sole purpose is to buy Congressmen's votes . They are so successful that even legitimate companies feel they must compete by buying their own congressmen .

Our Congress consists of a body of party trained people elected by job - holders , fed by special interests to run the largest business in the world . They are not businessmen so it comes as no suprise that our Country is a diaster.

Party politics demands patronage be sent down the way and this precludes any such thing as a balanced budget . Welfare is by far our most expensive program money wise , it has destroyed the moral fiber of one-half of the country . It has destroyed family life , our schools , filled our jails and left us a heritage of drug addicted children . This is a sacred cow of the Democratic party , an untouchable power base . What price VOTES .

For far less money by combining unemployment insurance with all the forms of welfare money there could be a guaranteed minimum wage job for anyone who wanted to work . Some would even have to pay taxes . This approach would save money and restore dignity to millions of people .

The party primary assures that only the party choices are eligible for the main election . This practice is as restrictive as a dictatorship and ninety eight percent of all congressmen are re-elected where they proceed to vote for the party first .

Here is the typical results on a major issue ( not including pay raises . )

| Democrats |         | Republicans |         | Americans |          |
|-----------|---------|-------------|---------|-----------|----------|
| for       | against | for         | against | for       | against' |
| 226       | 4       | 30          | 127     | 2         | 2        |

The 30 odd republican votes are liberals that for all practical purposes are Democrats . This is an outrage . Where has " by the people and for the people " gone ?

I say that your programs are dishonest . It is susposed to be an impartial view of both sides of our country . By lack of bringing some of the aforementioned wrongs to the publics attention puts you in the camp of the Liberal East . Further more analize your usual formats . A good percentage of your panels are journalists

or professors . The journalists are selected from Eastern publications such as the New York Times , the Washington Post , News Week and so on . The profesors from schools such as Harvard , Princeton , Columbia all a strong portion of the Liberal East . The call-in portion has but a very few minutes to state a case , he has practically no time to back his position with facts while the Liberal Expert has as long as he wishes to respond .

In the last eight years since I have retired and have had time to listen to " C " Span I hear such cliches as vote the rascals out or the most important thing you can do is come out and vote . None of your experts have ever told the truth , that our elections are rigged and that only a Democratic or Republican PARTY member can be elected . Why do they require millions of dollars in election funds when they only have one man to beat ?

I have never seen in one of your formats a group of mainstream Americans expessing their views and solutions , yes solutions that are not based upon lobbying or party wishes but a view of what's right for America . Like a first priority , a balanced budget . The only time I vote is when the lessor of two evils is apparent . That is a hell of thing to have to say but our media is to blame .

Why don't your formats take Congress off a pedestal they don't deserve ? How can a neutral media allow a third class of Americans , our Congress who does not and are not required to obey the laws of the land ?

One Congressman - stole thousands , made thousands more from savings and loan stocks , thousands more from phoney book deals . Retired with honor .

Another ran a whore house for eighteen months . He said he had no knowledge allthough he lived in the house at this time . In the U. S. ignorance is no excuse of the law .

A third stole thousands of dollars outright . Cried a little , plead guilty and is still in office.

A forth committed manslaughter and still serves .

The Keating five - all caught up in votes for sale .

How can there be separate standards for our congressmen when our constitution demands equal justice for all . When we steal we end up in jail . A Congressman gets a severe reprimand - WHOPEE .

Your Eastern Liberal educators all have fancy theories that they expound about structuring new classes . They are most eager to experiment so as consultants to Congress they fill their heads about how to spend billions more on education . In the past one such idea was called New Math . This caused the printing of all new text books the re-education of all math teachers and resulted in the classes counting birds instead of learning the multiplication tables which will stay with you all your life . Math sunk to new levels .

Once again with a new generation the educator's have raised a hue and a cry to Congress and these minions gleefully accept the baton . Spend Billions , show the people we care about their children's education . " It's our heritage " , scream the Liberals.

██████████ took one school in the New Jersey ghetto which managed to be on the bottom in any level of testing . He spent \$ 15.00 for a baseball bat and \$ 35.00 for a Bull horn . After bashing a few heads , throwing the drug pushers out of school , getting rid of the smart asses who wished to destroy the classes , he raised the Sat scores to impressive levels . Naturally Joe got in trouble with the education board because his system worked .

Our Congress will never adapt a system that doesn't cost billions although it has been demonstrated that the lack of discipline is the main cause of failure of our schools . The lack of a male figure of authority in the home is the second largest cause . This the result of Welfare .

Combine Medicare , Medicaid money with the Veteran's Hospitals . Make them the primary health centers . Put all the rest in a satellite position who would receive patients at the government approved cost , or not at all . Have doctor centers in all cities on salary . Charge any complaint an initial \$ 5.00 charge , if serious sent to V. A ( school busses ) for evaluation . They would take care of it or refer the patient to a satellite Hospital that specialized in that field .

Put future doctors thru medical school with a five or ten year contract to perform services upon graduation .

One of the main causes of run-away medical charges is the outrageous cost of liability insurance . Congress will not touch it . Why ? Too many of those good old boys , party members , derive a huge profit from it . Along this line the limit of liability should be established somewhere within reason . No , like drugs all legislation is stone-walled .

Drugs , not one tough law has been passed in seventy five years at the only place drugs can be controlled . This is at the retail level where the seller is at risk in every sale . Yes , the death penalty for wholesalers , importers , mules , chemists , and bankers . Congress , for a profit for the good old boys prefers allowing school children to be murdered in wholesale numbers rather than drop the protection afforded to the drug cartels that pay lavishly for protection .

You are the only media which can help with much needed reform to our country which has stagnated under the yoke of party politics .

I make one more suggestion . We eliminate the two party system ( for that matter all political parties ) and pick our Congressmen from the best of Farm bureau , Rotory , Kiawans , Better Business bureau . One election , 5 or 7 on the ballot . This , a mail in computer card with a dossier on every entry .

These are all business men who have already exhibited a desire for the betterment of America . They would owe no one , with any form of lobbying illegal carrying a jail sentence .

I certainly have had enough of our Congressmen being selected ( as most of them put it , " by public mandate " ) with twenty percent of the vote . Job-holders at that . Our country is at stake .

We are inundated with the Liberal East . Congress , all the major networks , Dan Rather , Peter Jennings , Sam Donaldson . Most publications , New York Times , The Washington Post . Most all of your experts , the Eastern Professors are on the far left .

You certainly are aware of the deplorable state of our country but by choice you refuse to be honest , you seem to be just another part of the media , Liberal . Remember that more than half of the people in the United States vote conservative ( Republican President )

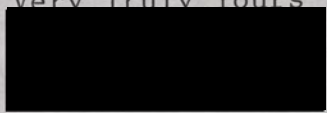

7 .

Even though over one half of our country is conservative there is no major publication for the airing of their ideas . Why not even up just the slightest bit this inequity , have a mainstream American oversight committee meet on television once a month to kick around some new approaches and critique our present laws . ( After Congress passes a law they never review cause and effect ) . Congress is never going to pass any legislation that isn't party or lobbied oriented .

We the people should have some voice as our Constitution states but we don't . The people have good ideas but they have no place to showcase them . Being white and conservative as far as the media is concerned is like living in the dark ages as a Gypsy .

I have written a book along the enclosed ideas but the choice of publishers who have a tolerance for conservatism is indeed limited . If you could help me with a few names I would be deeply appreciative .

Very Truly Yours ,

  
 .  
Greensburg , Ky . 42743 .

P . S . One closing thought : I believe in abortion does this make me a Liberal ?
